

# Viaduct West of Multnomah Falls Emergency Closure

August 24, 2024

From Oregon Department of Transportation:

The West Viaduct near Multnomah Falls, part of the Columbia River Historic Highway, will close tonight for urgent structural repairs and will remain closed until repairs are complete. The closure will likely extend through the Labor Day Weekend. In addition, the Columbia River Historic Highway between Bridal Veil and Ainsworth (mileposts 14-22) will have a vehicle restriction, prohibiting trailers or long loads until further notice.

The best way to visit Multnomah Falls continues to be via Exit 31 on I-84 or take transit.

The Viaducts are currently being restored and repaired, for more information on that project, see below.
